Mainau Green School

Pro Integration

Dear readers,

“**Gardening for All e.V.**” (“Gärtnern für Alle”) is a non-profit organization with the purpose of promoting education for people with learning difficulties as well as people of all age groups in the area of environmental education.

Through strict educational plans and cultural differences integration problems arise which especially prevent people with learning difficulties from participating in social life.

With “**Pro Integration**” through a familiar environment and holistic monitoring we give them the chance to enter into a regulated professional life thus connectedly acquiring a socially strong environment.

“**Mainau Green School**”, an extracurricular environmental education institution, also has a holistic approach and has been offering children and youth projects in and with nature for more than 20 years.

I am personally glad and in my function as chairwoman of the association to be able to make a lasting contribution to an ecologically and socially stable sustainable society.

Sandra Bernadotte

Countess Sandra Bernadotte
Chairwoman of the association “Gärtnern für Alle”

Fascinating Nature – Learning, Experiencing, Understanding

Mainau Green School is an extracurricular environmental educational institution that offers children and youngsters an experience-oriented approach to ecological topics. The interdisciplinary and based on the contents of the educational scheme-oriented alignment, makes the combination and internalisation of the school-learned contents possible for the children and youngsters.

We offer projects of about 2 hours on topics such as:

- * Experience of nature (in different ecosystems)
- * Gardening for children
- * Enchanting butterflies
- * Water worlds
- * As well as projects in direct consultation to educational plan-relevant topics of your lessons

Your Chance

“Pro Integration“ is an eleven- month prevocational education scheme, supported by the employment agency, for youngsters with special educational needs.

The scheme includes:

- * Regular, practical work in the occupational field of horticulture and in the professional field of gastronomy in “Café Vergissmeinnicht“ as a guidance on the way to professional life
- * Individually coordinated social educational care
- * Internships in companies in different fields of study
- * Lessons in general educational school subjects

Through combining different offers and personal support, the regulated living and working in the community as well as combining the transfer of knowledge and practice in the field of education and personal area, a holistically-oriented education is made possible for the youth. They will be prepared for an independent life and strengthened as well as encouraged in their abilities. Social an vocational integration is provided sustainably in that way.
